ABOUT **US**

Energizer is leading the power category worldwide with a powerful portfolio of ground-breaking products and consumer-led innovation.

Our battery products are sold in more than 140 markets around the globe.

We offer simple solutions for an on-the-go world full of technology and connectivity.

Our mission has been to innovate, with both performance and responsibility in mind, to maximise performance in our products to give power that our customers can use and depend on.

Innovation at the heart of our strategy

From the first dry cell battery back in the 1890's, we have continuously built a rich history of powerful advancements with innovation always at the heart of the strategy.

POWERING YOUR **OEM NEEDS**

As one of the world's premium battery suppliers for OEM manufacturers and distributors, **Energizer** provides a comprehensive product portfolio of premium brands to accommodate unique needs in the OEM industries.

These great products are supported by our Global team, who will work directly with you, our OEM partners and distributors. We aim to supply you a wider range of performance products supported by our dedicated technical support team that understands your unique business needs.

Powering your OEM Needs

Logistics and supply chain excellence to access our formidable global footprint of manufacturing and distribution facilities.

Innovation and Quality built in our battery category over years of engineering innovation and investment, and multiple world firsts.

ΤМ

Customer confidence to maximise a great consumer experience by powering your device with powerful, long-lasting and reliable Energizer® batteries.

Competitive Advantage to optimise sales, differentiate your products and engage with your new consumers, through the global Energizer_® brand.

A Powerful Marketing Tool to amplify shopper experience! It showcases your device fitted with premium **Energizer**_® batteries, being ready to deliver unparalleled power when your consumer needs it.

Doing the right thing for the planet and our customers

At **Energizer**, we are focusing on reducing the impact our company and products have on the environment. Our purpose is to responsibly create products to make people's lives easier and more enjoyable. We ensure consumers enjoy our products today without sacrificing tomorrow.

For the full sustainability report scan the QR code

Greenhouse gas emissions reduced in 2022 by performing an energy study and conserving more than 11,000 MTCO2e throughout our operations.

In Europe, we are **saving approximately 3,600 tons** of plastic over the next 10 years¹ due to our transition from plastic to paperboard packaging.

Across all of our international manufacturing sites, approximately 46% of all waste generated is recycled.

Half a million litres of water saved per month per year at our Asheboro, North Carolina facility since 2014.

Energizer invites you to join our long-lasting journey to a better future.

Our program, which runs through 2030, includes three core goals:

Goal		Goal Year	Progress Towards Goal	
Our Product Sustainability Goal	 100% of new products will have a sustainability assessment by 2025. 	2025	We have setup this process for our categories.	75%
Our Sustainable Packaging Goal	 Primary packaging in Europe supports responsible forestry. 30% recycled content in post-consumer packaging by 2030. Goal is measured by looking at all product packaging by weight. Packaging is defined as all primary (consumer selling unit) and secondary (shipping unit) packaging. 100% of Energizer's corrugated packaging are fully recyclable. Recycled content includes only post-consumer recycled content. 	2030	Over 32% post-consumer recycled content in packaging.	100%
Our Climate Emission Goal	 30% reduction of our greenhouse gas (GHG) emissions by 2030 in our direct operations (scope 1 and scope 2). Emissions will be measured using fiscal year 2021 as the base year. 	2030	9% - Reduction of more than 11,000 MTC02e between 2021 and 2022.	30%
